Re: Fieldwood Energy LLC's Proposal and Approval for the **Completion of the GC40#1 Well**
Green Canyon 40 Unit Area - Katmai Development Covering Portions of Green Canyon 39
(G34966/G36476), 40 (G34536) and 41 (G34537) and Ewing Bank 1009 (G34878), 1010 (G34879)
and 1011 (G34880)

Partners:

Fieldwood Energy LLC ("Fieldwood"), Ridgewood Katmai, LLC ("Ridgewood") and ILX Prospect Katmai, LLC ("ILX") are Parties to that certain GC 40 Unit Operating Agreement dated April 1, 2018 covering the GC 40 Unit (the "Katmai UOA").

By letter dated November 1, 2018 and pursuant to Article 12.5.1 of the Katmai UOA, the Parties have approved a Development Plan for the Green Canyon 40 Unit Area ("Katmai Development Plan").

Pursuant to the Katmai Development Plan and in accordance with the relevant Katmai UOA Articles referenced below, Fieldwood, as Operator of the Green Canyon 40 Unit Area, hereby proposes to the Parties the operation described below and in the attached AFE and accompanying documents:

GC 40 #1 Completion

Objective / Completion Zone: Purple Sand (Middle Miocene) @ 26,105' MD / 26,021' TVDSS which is a "Producible Reservoir" as that term is defined in the UOA

AFE No.: FW 202002

Gross AFE Amount: \$49,623,320

GC 40 #1 well was drilled to 27,900' MD / 27,899' TVD by Noble Energy between 3/22/2014-8/15/2014. The well was temporarily abandoned for future tieback operations with a 7-3/4" liner across the Purple Sand (Zone 1). Between 5/31/2019 and 6/16/2019, the GC 40#1 well was cleaned out by drilling T/A plugs along with packer debris fish in the well to ~14,300', tiedback by running a 10-1/8" x 10-3/4" tieback production string and performing a "dirty displacement" from 16.5 ppg SBM to 16.0 ppg ZnBr/CaBr and was suspended for future operations.

This Completion AFE (FW202002) is for the cost estimate for all tangible completion equipment (primary and back-up), plus all associated services required to complete the GC 40#1 Well in the Purple Sand (Middle Miocene) @ 26,105' MD / 26,021' TVDSS (which is a "Producible Reservoir" as that term is defined in the UOA) inside 7-3/4" casing. This estimate does not include the Subsea Spool Tree and Tubing Hanger, nor any other subsea equipment. This estimate includes Safety Valve, Chemical Injection Valves, Downhole Pressure & Temperature Gauges, Packers & Accessories, Tubing & Accessories, etc. It also includes an estimate for intangible costs such as upfront engineering time for the design and analysis work, plus all associated services required to complete the well. The current estimated start date is 2/5/2020

This Completion AFE (FW202002) includes \$12,146,112 of previously approved costs captured in the Completions Long Lead AFE (FW 192007) and upon commencement of the completion operations, such previously approved costs will be reallocated to this Completion AFE.

This AFE is proposed subject to Article 8.6.1 and Article 13 of the Katmai UOA which requires an approval by Election of the Parties. In accordance with Article 8.2.2, approval of the above AFE shall require the affirmative Election by one (1) or more Parties, entitled to make an Election, with a combined Electing interest of twenty-five (25%) percent or more.

Fieldwood hereby Elects to approve the above AFE. Pursuant to Article 8.6.1 of the Katmai UOA, each Party has thirty (30) days after Receipt of this AFE to respond with its Election.

If this AFE is acceptable, please evidence your approval by Election by executing the AFE and returning a copy of same to the attention of the undersigned. If you have any questions with respect to this proposal, please contact Nathan Vaughn at 713-969-1085 or Nathan.Vaughn@fwelc.com

Yours very truly,

Nathan M. Vaughn
Deepwater Land Advisor
